## PRELIMINARY AMENDMENT

Prior to examination, please amend the application as follows:

In the claims ✓  
Cancel claims 1-57 without prejudice.

Please add new claims 58-107 as follows:

58. An angle-measuring interferometry system comprising:  
an interferometer which during operation directs a measurement beam to contact a measurement object, the interferometer comprising a beam steering assembly having a beam steering element positioned to contact and direct the measurement beam and an electronic positioning system to selectively orient the beam steering element within the interferometer; and  
an angle measurement system which during operation calculates a change in angular orientation of the measurement object based on a measurement signal derived from the measurement beam.
